215 446 8120

Michael O'Malley is Ice Miller's Director of Infrastructure where he oversees the information technology (IT) plan for the firm. Michael leverages his knowledge of IT implementations, systems engineering, process improvement, and project management to successfully facilitate significant and sustainable business growth. He is adept at creating scalable information technology roadmaps that improve organizational productivity, while generating sustained cost-saving opportunities.

With more than 20 years of leading infrastructure teams, Michael is consistently seeking innovative ways to meet the firm's goals while keeping up with new technologies and focusing on secure implementation of applications to shape top-tier teams at the forefront of innovation and IT proficiency.
